

## GaneTime Time & Attendance System

*GaneTime* is the result of over 50 man years' experience within Time & Attendance, evolving with the changing role of Time Recording within today's businesses. From traditional industries where the emphasis is on tight management of weekly paid employees, with irregularities being automatically reflected in employee's pay, to the more recent emphasis on annualised hours, flexible working patterns and job sharing.

With its unique Rules based design, *GaneTime* can be quickly tailored to the specific working practises of any client. This is apparent from the wide variety of industry sectors who have already benefited from *GaneTime*. These include Construction, Off Shore Engineering, Chemical Industry, Financial, Clerical, Heavy and Light Engineering, Distribution, Local Government, Airports, Food Processing and Utilities.

The primary function of *GaneTime* remains to record the hours of attendance of employees with differing work patterns, and compare these with their expected attendance over the same period. Variations to this information can then be authorised and subsequently transferred to the Company Payroll.

*GaneTime* is far more than a simple Time & Attendance system, it is a management tool designed to help increase productivity and efficiently control staff by measuring attendance performance against the specific existing working practises of the client.
